### **Letter of Reference: Sino-European Health Summit 2021**

Formerly known as the Guangzhou Development District, Huangpu is one of China's Top 3 innovation and high tech locations, located at the Greater Bay Area. On October 7<sup>th</sup>, 2021, Huangpu supported SILREAL GmbH as the gold sponsor during the organization of the Sino-European Health Summit 2021 in Berlin.

With five panel discussions, two keynote speeches and 100+ guests on-site, the goal of the event was to connect various stakeholder groups from the Sino-European healthcare industry. Those discussions specifically addressed emerging trends, regulations, and challenges that digitalization and new technologies bring to the healthcare sector as well as models to cooperate in the Sino-European context.

We would like to thank SILREAL for successfully organizing the Health Summit and building a bridge between the Chinese and European healthcare market. The event achieved its objectives and brought up a productive and high-quality exchange between the invited stakeholders.

On behalf of Huangpu District, I wish SILREAL as a young, energetic consultancy with great potential further success in developing a sustainable interface between the Chinese and European healthcare sector.

Dr. Daniel Frerichs
